How you can contribute

Page 7

Overview of Regional Platforms

Page 8

The UN ISDR Private Sector Partnership (DRR-PSP) and the UN ISDR Private Sector Advisory Group (PSAG) have organized themselves into five activity-oriented Private Sector Working Groups, to drive and support private sector engagement in resilience and disaster risk reduction. It is still possible to jump on the train and contribute with your expertise. Please email your interest to isdr-psp@un.org.

Working Group 1 (WG1) : Catalyze public-private partnerships to impact communities Match local governments' needs with private sector expertise.				
 Target audience	Cities and local governments	 We promote	The Disaster Resilience Scorecard, P/P workshop tool kit, and a marketplace PPP exchange.	Page 2
Working Group 2 (WG2): Private Sector Resilience in Sustainability How do companies practice, and report good business continuity management and risk-aware investing?				
 Target audience	Corporate	 We promote	Sustainable business practices through the recognition of top 10 sustainability reports.	Page 3
Working Group 3 (WG3): Start multi-stakeholder partnerships at a Global Level Spread the word: sustainable development objectives cannot be achieved without effective management of risk.				
 Target audience	Large private- and multi-sector networks	 We promote	The resilience-development-climate connection and UNISDR/HFA2 recognition	Page 4
Working Group 4 (WG4): Increase business commitment for DRR-PSP 5 Essentials Create a community, engage our peers, showcase good practices and find new partners - and make the case to join.				
 Target audience	UN ISDR Private Sector Partnership (DRR-PSP)	 We promote	The means as well as the reasons to join and be active in the PSP network.	Page 5
Working Group 5 (WG5): Business contributions to design and implementation of HFA 2 With special focus on the lynchpins of change towards risk-aware investment, the finance and insurance sectors.				
 Target audience	Private sector at HFA2 consultations	 We promote	Key messages from private sector for HFA2, voluntary commitments from industry sectors.	Page 6

WG1: Catalyze public-private partnerships

DESCRIPTION

WG1 will center its activities on the **Disaster Resiliency Scorecard (DRS)**, which will be used by cities to develop multi-year city plans to address gaps in resiliency preparedness. Additional WG targets include a Public/Private (P/P) sector workshop tool kit, and a marketplace to connect suppliers to buyers.

The DRS has already been developed and will be undergoing evolution as it is applied. This process will be based upon test applications of the DRS with a few cities. As the DRS is finalized, application will be shifted to funded projects via the R!SE Initiative. WG1 will also create a toolkit to facilitate discussions between public and private sectors. Through such activities, WG1 will identify and share local best practices and find further applications of the DRS. For 2014-2015, WG1 plans to promote the application of the DRS and to develop the concept of a face-to-face “marketplace.” The upcoming regional platforms and the 2015 WCDRR will be venues to promote the use of DRS and P/P workshops in close partnership with UNISDR’s *Making My Cities Resilient* Campaign.

What is the Disaster Resiliency Scorecard? ([link to Scorecard](#) & [link to FAQ](#))

- Modeled after the UNISDR *Making My City Resilient* Campaign’s Ten Essentials, adopted by >1,650 cities.
- Developed by AECOM and IBM as an 80+ question quantitative tool to evaluate relative to Ten Essentials. As the DRS is computerized, individual questions will be weighted to produce a consolidated score.
- DRS is used by the cities to conduct self-assessment – it is not to be used to publish scores. The DRS will identify priorities for investment and attention over a multi-year planning period.
- One output from the DRS is a gap analysis, used by cities to develop a multi-year action plan, or ‘blueprint,’ that will define the steps needed to be taken by the city to improve resiliency – e.g. code changes, ordinance or regulatory changes as well as capital expenditures to improve city resilience.

Activities

1. Develop the DRS for beta testing, make available to public via UNISDR Preventionweb.
2. Further develop RS, RS-based applications and tools, e.g. conduct public/private sector workshop to test concepts and ideas; connect with like-minded initiatives e.g. at Rockefeller Foundation and the World Bank.
3. Beta test RS.
4. Participate and promote RS in UNISDR and other meetings with city focus.
5. Post best practices.
6. Conduct 50 RS evaluations via R!SE.

Outcomes

1. Issued press release by UNISDR, AECOM & IBM on DRS; issue Version 1.0 of DRS on Preventionweb by June 2014.
2. Issue tool kit for public / private sector workshops around DRR based upon RS by September 2014.
3. Complete DRS beta testing at 3-5 cities.
4. Participate & promote DRS in upcoming meetings: R!SE launch, World Urban Forum, Making Cities Resilient Campaign, World Cities Summit.
5. Post up best practices via Preventionweb.
6. Conduct 50 RS applications by 2016 via R!SE.

Lead: Dale Sands, AECOM

WG2: Private Sector Resilience in Sustainability

DESCRIPTION

WG2 will focus on gathering knowledge, insights and information related to private sector actions, plans and programs that have a direct effect on business and their contributions to reducing impacts of disasters at the “system” level.

What do we mean by the “system” level?

The “system” includes all aspects of the business itself, its employees, supply chain(s), customers, communities, government entities, shareholders and stakeholders.

WG2 will examine **resilience in sustainability reporting** as a means of providing visibility to good practices of companies in managing risk and building resilience and to determine if this will be able to provide a fresh view on company risk management to shareholders. This examination will inform voluntary commitments to HFA2 for the private sector, and will explore standardized ways of reporting on how they build and avoid risk.

WG2 may additionally explore if such reporting can be standardized, and if this will fit within the context of HFA2. WG2 may also develop a report that will rank the top 10 companies that does the best sustainability reports to showcase such good practices. This will likely include and highlight the issue of Business continuity planning (BCP) and Business continuity management (BCM).

Activities

1. Identify and inventory existing private sector initiatives aligned with DRR/Resilience, especially as captured through current sustainability reporting mechanisms.
2. Showcase those companies demonstrating best practices in the area.
3. Prioritize the initiatives and determine those metrics that are the most needed, common, useful and attainable.
4. Recommend how these initiatives and their metrics might be translated into actions suitable for inclusion in the HFA2 Framework.

Outcomes

1. Engage 10 PSP companies that agree to be inventoried. Produce Inventory Report of sustainability metrics and initiatives that align with DRR/Resilience (using the Global Reporting Initiative (GRI) as basis).
2. Showcase companies demonstrating best practices.
3. Deliver a prioritization matrix illustrating sustainability initiatives that are most critical & enabling for DRR/R.
4. Collaborate with other WGs & transfer insights & knowledge for inclusion in their work and outcomes as appropriate.
5. Produce a discussion report for the UNISDR with recommendations to be used by other sustainability ratings organizations (TBD) to encourage collection, recognition and crediting of DRR/R in sustainability reporting.

Lead: Debra AK Johnson, DuPont

WG3: Start multi-stakeholder partnerships at a Global Level

DESCRIPTION

WG3 will focus on **connecting resilience and DRR (R/DRR) to the Sustainable Development Goals (SDGs) and the Climate Agendas** by developing clear examples of the linkages, including examples of costs and benefits, and by using these for advocacy in relevant forums. At the moment, the relationship between these three mutually reinforcing agendas, especially on the practical level, is one of the most debated but least understood. Connecting these agendas is also one of UNISDR's main tasks and having the private sector explaining this need adds urgency and leverage to global discussions of these issues.

Many private sector-led multi-stakeholder initiatives already exist and are actively promoting two of the three UN agendas that WG3 wishes to connect, notably the UN Global Compact and WEF on the international level. By building understanding among the private sector belonging to these established organizations on the importance of resilience, WG3 can catalyze a global groundswell of interest towards R/DRR. To enable this work, WG3 will **lead the compilation of a briefing kit making the case for linking the three goals**, as well as strategizing and leading the advocacy efforts.

Activities

1. Compile briefing kit that ties in R/DRR to SDG and Climate Agenda.
2. Advocacy towards private sector in multi-stakeholder networks.
 - hold at least 1 workshop in all five regions.
 - introduce R/DRR and UNISDR agenda at meetings.
 - work with networks.
3. Advocacy towards non-private sector stakeholders in multi-stakeholder networks.
 - communicate GAR13 message on private sector.
 - Strategize PSP/PSAG representation in UN and UNISDR events with SDG or Climate focus.

Outcomes

1. Compile briefing kit by May 2014
2. Advocacy towards private sector
 - Hold 1 workshop in each region in 2014
 - Introduce UNISDR agenda at WEF meetings
 - Organize groundswell of interest in R/DRR to reach UNGC-HQ; outreach to established disaster interest groups within WEF
3. Advocacy towards non-private sector
 - Advocate at opportunities in 2 above.
 - At UNISDR regional consultations; SIDS conference, UN Climate Summit, CC COP, WCDRR, climate change meetings in 2015, etc.
4. Continue with updated message post-2015.

Lead: Sandra Wu, Kokusai Kogyo

WG4: Increase business commitment for DRR-PSP 5 Essentials

DESCRIPTION

WG4 is focused on **enabling understanding and collaboration** across both current and prospective UNISDR Private Sector Partnership (DRR-PSP) members, to support the implementation of the *Five Essentials for Business in Disaster Risk Reduction* described in the PSP membership pack.

WG4 will also work to expand the PSP network with regional and broad industry representation by clarifying and communicating the value of participation in the PSP and clarify how this work aligns with other public-private networks, platforms and organizations. In preparation for the 2015 WCDRR, WG4 has been tasked to identify best practice and guidance for strong public-private partnerships.

What are the Five Essentials?

The current private sector commitment, 'The 5 Essentials', was established in 2011 and includes the following essentials:

- 1) Promote public-private partnerships for resilience
- 2) Leverage private sector expertise and strengths
- 3) Foster a collaborative exchange and dissemination of data
- 4) Support national and local risk assessment
- 5) Support the development and strengthening of national and local laws, regulations, policies and programs

Activities

1. Connect PSP members with 2014 work groups and UN ISDR regional platforms.
2. Harmonize PSP communications for 2014 Regional Platforms and collaboration events.
3. Identify long term tools and resource needed to support PSP membership expansion and sustainable engagement.
4. Research and develop guidance from SMEs on public private partnerships for the 2015 WCDRR.

Outcomes

1. PSP membership given opportunity to engage in UN ISDR activities.
2. Provide inspiring and consistent PSP messages to increase participation and understanding.
3. Tools and resources defined and sourced by PSP members.
4. Paper and session materials for WCDRR created to inform and advance public and private sector engagements in communities and countries.
5. Increase of PSP membership and participation during 2015 WCDRR.

Lead: Jack Holt, GSK

WG5: Business contributions to design & implementation of HFA2

DESCRIPTION

WG5 will focus on both **developing the substantive inputs to the HFA2** from the global business community, and ensuring that the inter-governmental process negotiating the HFA2 considers these inputs.

For this purpose, WG5 will seek to incorporate the key aspects from all Working Groups, as well as wider inputs that will be gathered during the online and regional consultation processes in 2014. The online consultation process will afford the opportunity to all stakeholders to share their views on the future direction of HFA, the results of which will provide material and guidance in preparation for the regional consultation process in May and June 2014.

Alongside these consultations, WG5 will create subgroups within each industry regarding key approaches to disaster risk reduction and resilience, in order to ensure industry-sector focused content in HFA2. Key sectors that are likely to form part of a subgroup include construction, infrastructure, and engineering; energy, utilities and telecommunications; manufacturing; transport and tourism; agriculture, food and beverage; retail; healthcare; and urban planning and cities.

Activities

1. Engage with all Working Groups to discuss and refine private sector input into HFA2.
2. Promote and coordinate online and regional consultation processes.
3. Hold a dedicated HFA2 Business Sectors meeting to raise widespread awareness of HFA2 and engage with key stakeholders.
4. Produce supporting materials to inform the HFA2 process and promote effective dialogue; maintain an “evolving draft HFA2 input.”
5. Work to achieve effective and accelerated implementation of HFA2 in 2015.

Outcomes

1. Create HFA input draft and invite discussion.
2. Jointly supervise online consultation process with UNISDR. Ensure participation at all regional consultation processes by WG5 members.
3. Organize and hold meeting in London in June 2014, ensuring representation by private, mutual/cooperative, and financial sectors.
4. Transmit a coordinated message from the private sector while incorporating input from different sectors and regions during consultation process.
5. Consider and implement industry-focused applications of HFA2.

Lead: Rowan Douglas, Willis

Working Group 1 (WG1) : Catalyze public-private partnerships to impact communities

1. Participate in beta testing scorecard with selected, target cities.
2. Assist to finalize version 1 of the resiliency score card and then to promote use and application.
3. Identify and promote best observed practices to improve DRR.
4. Conduct public-private workshops to develop collaborative approach to improving city DRR.

Working Group 2 (WG2): Private Sector Resilience in Sustainability

1. Contribute initiatives and best practices from own organizations.
2. Outreach to a broader audiences, recruiting suppliers, customers and other connections to be involved in data gathering.
3. Analyse input & provide opinions and guidance (initiatives, standards, metrics).
4. Help develop and deliver communications, educational and awareness building programs & materials.
5. Volunteer to represent DRR-PSP in UN and UNISDR events.

Working Group 3 (WG3): Start multi-stakeholder partnerships at a Global Level

1. Contribute towards the briefing kit – ideas, examples, and leadership.
2. Tell us what organizations/networks your company belongs to, that you can approach on UNISDR's behalf.
3. Organize workshops and sessions, volunteer at network meetings to promote UNISDR agenda.
4. Volunteer to represent DRR-PSP in UN and UNISDR events.

Working Group 4 (WG4): Increase business commitment for DRR-PSP 5 Essentials

Provide the following resources or subject matter expertise:

1. Presentation, video, or digital communications development .
2. Research and/or experience with sustainable public/private partnerships.
3. Methods and tools for efficient collaboration and knowledge management.

Working Group 5 (WG5): Business contributions to design and implementation of HFA2

1. Promote and support the online consultation process.
2. Participate and recruit attendees to the world-wide HFA2 regional consultation process.
3. Help incorporate selected inputs into the new HFA agreement and architecture.
4. Support the development of mechanisms, services and institutions which will enable the optimal implementation of HFA2 provisions within diverse business communities post-2015.

It is still possible to jump on the train and contribute with your expertise: gain visibility for your work and business development. Please email your interest to isdr-ppsp@un.org.

Regional Platforms

Regional Platforms and Ministerial meetings in 2014 will double as regional consultations of the post-2015 framework for disaster risk reduction (HFA2), and having private sector present at these events this year will be critical. While these meetings are primarily about intergovernmental collaboration, they are a great opportunity to connect with other committed stakeholders, and most programmes will also include events for the private sector.

Following is a list of **confirmed business events** at Regional Platforms and Ministerial meetings (as of April 2014).

Regional Platform for Africa: 13 – 16 May 2014, Abuja (Nigeria)

- | | | |

| <p>Thursday 8 May, 14.00-17.00</p> <ul style="list-style-type: none"> ❖ Informal Round Table: The Future of DRR & Role of Public, Private and Scientific Communities | <p>Tuesday 13 May, 09.00-12.30</p> <ul style="list-style-type: none"> ❖ Private Sector consultation for Africa Contribution to Post-2015 Framework for DRR for Recommendation to the Ministerial Segment <p>Wednesday 14 May, 09.15-10.30</p> <ul style="list-style-type: none"> ❖ Risk Financing | <p>Thursday 15 May, 11.00-13.00</p> <ul style="list-style-type: none"> ❖ Investment in DRR – The Business Case <p>Visit the website & register here.</p> |
|--|---|--|

European Business Summit: 14 May, Brussels (Belgium)

The Assembly of European Regions is official partner of the 2014 12th Summit. The theme this year is “Rebuilding a Competitive Europe – The Business Agenda 2014-2019”.

Every year, this Summit attracts more than 1,500 participants from over 60 countries, including European Commissioners, Prime Ministers, high-ranking individuals and about 200 journalists. The European Business Summit will host the **discussions on the role of the private sector for disaster risk reduction and resilience for the European region.**
