## UNISDR GETI and the Office in the Americas trains 35 professionals in Disaster Risk Reduction planning

Thirty-five professionals in disaster risk management from 16 countries of the Americas successfully completed their training in structuring disaster risk reduction plans within the framework of the international programme promoted by the Global Education and Training Institute (GETI), the United Nations Office for Disaster Risk Reduction (UNISDR) training body. Among the global targets of the Sendai Framework for Disaster Risk Reduction 2015-2030 is to significantly increase the number of countries with national and local disaster risk reduction strategies by 2020, with an expected increase in the regional demand for specialized technical training, such as the training provided by this intensive 35-hour programme.

## Technology: the future of disaster risk reduction?

Fast-paced tech developments have the potential to help the world rein in the impact of natural and human-induced hazards, notably when it comes to tackling urban risk. The annual Korean Making Cities Resilient event, held at the annual K-Safety expo, drew 222 officials from 176 Korean cities for a special 'Tech for DRR' seminar in partnership with ICLEI, KAIST and POSTECH.

### Provinces, Cities, and Municipalities of Bicol Region. Philippines Embrace the Local Implementation of the Sendai Framework

Over 85 mayors from the entire Bicol region gathered together to learn and share local approaches and measures to manage and reduce risk and to enhance recovery planning. The UNISDR GETI Workshop organized with the leadership of Ms Madelaine Yorobe Alfelor, Mayor of Iriga City and Ms Violeta Seva, UNISDR Advocate for Making Cities Resilient Campaign and in collaboration with the International Recovery Platform and UN Habitat was an opportunity for the Mayors of Bicol Region to sign up for MCR campaign and expressed their commitment to promote resilient towns and communities in their respective localities.

### Mongolian cities tackle

Curbing deaths from disasters requires local authorities and other community partners to raise their capacity to manage risks and thereby ensure safe and sustainable development for their citizens. In Mongolia, the government has committed not only to national action but also to fostering cities' capacity. Deputy Prime Minister Khurelsukh encouraged the mayors of the three cities to integrate disaster risk reduction into local development policy and urban planning and implement it.

### Munda Island built the Business Case for Disaster Risk Reduction

the UNISDR GETI and the UNISDR Pacific Office's training of this kind was first ever in that part of Solomon Islands, which brought practical tools for businesses to learn about disaster risk management and to strengthen collaboration with each other as neighbouring businesses on a small island. Key areas for concrete actions such as reinvesting in safer infrastructure, securing back-up storage in safe locations, identifying alternate work sites, back-up power supplies and implementing scenarios and drills for staff and guests were recognized by businesses.

### Yangcheon-gu: Becoming a resilient city

Yangcheon-gu, a district of metropolitan Seoul, already has programmes emphasizing the needs of the elderly and disabled, and disaster and safety preparedness and planning. A 31 October workshop boosted their disaster risk reduction knowledge and shared how to share their experience via the Making Cities Resilient campaign.

### Disaster Risk Reduction Workshops for primary healthcare - Northern Queensland

132 participants attended a series of workshops held in Cairns, Mackay and Townsville, Australia organized by UNISDR GETI and the Northern Queensland Primary Health Network. Traditionally, the health response activities post-disaster have focused on immediate trauma and communicable diseases. This focus remains despite the actual risk of post-disaster communicable disease outbreaks being low, particularly in developed countries. The purpose of the workshop was to facilitate integration of the primary healthcare sector into disaster management.

### Korean National University of Education (KNUE) commits DRR to curriculum

The KNUE President has signed an agreement with the UNISDR GETI for the cooperation of school safety education programmes. In the future, the two organizations will work together to educate future principals and teachers. On the occasion, a primer in teaching disaster risk reduction in the classroom was attended by over 200 second-year teachers' college students.

### Education Reduces Disaster Risk

Did you know that students of all ages can participate effectively in school and community safety measures and work with teachers and other adults to minimize risk before, during and after disasters? The Incheon City 'Towards a Culture of Prevention for Korean Students' training programme has kicked off with national interest.
