Media's role

**in getting the message out and raising awareness on
disaster reduction, before disaster strikes.**

At the Roundtable, senior journalists, relief officials, and scientists explored the involvement of the media in disaster mitigation and practical means for improving relationships among the media, disaster relief and scientific communities

International Federation
of Red Cross and Red Crescent Societies

Timely

Reliable

Accurate

Sensitive

Effective

Cost-effective means of saving lives, reducing property damage, and increasing public understanding.

Communications technologies link to

Scientists – Public Disaster Mitigation Officials

Education – Disaster Preparedness, tracking

Alert authorities and warn people

Collect information, supplies resources

Coordinate rescue and relief

Motivate public, political, institutional response

**As new technologies have significantly growth,
vulnerability has also increased**

**to ensure proper and
adequate link between the
media and local
communities**

**Media contributes to save lives
and to do that, it requires better
understanding of their social
role to mitigate the impact of
any type of disaster.**

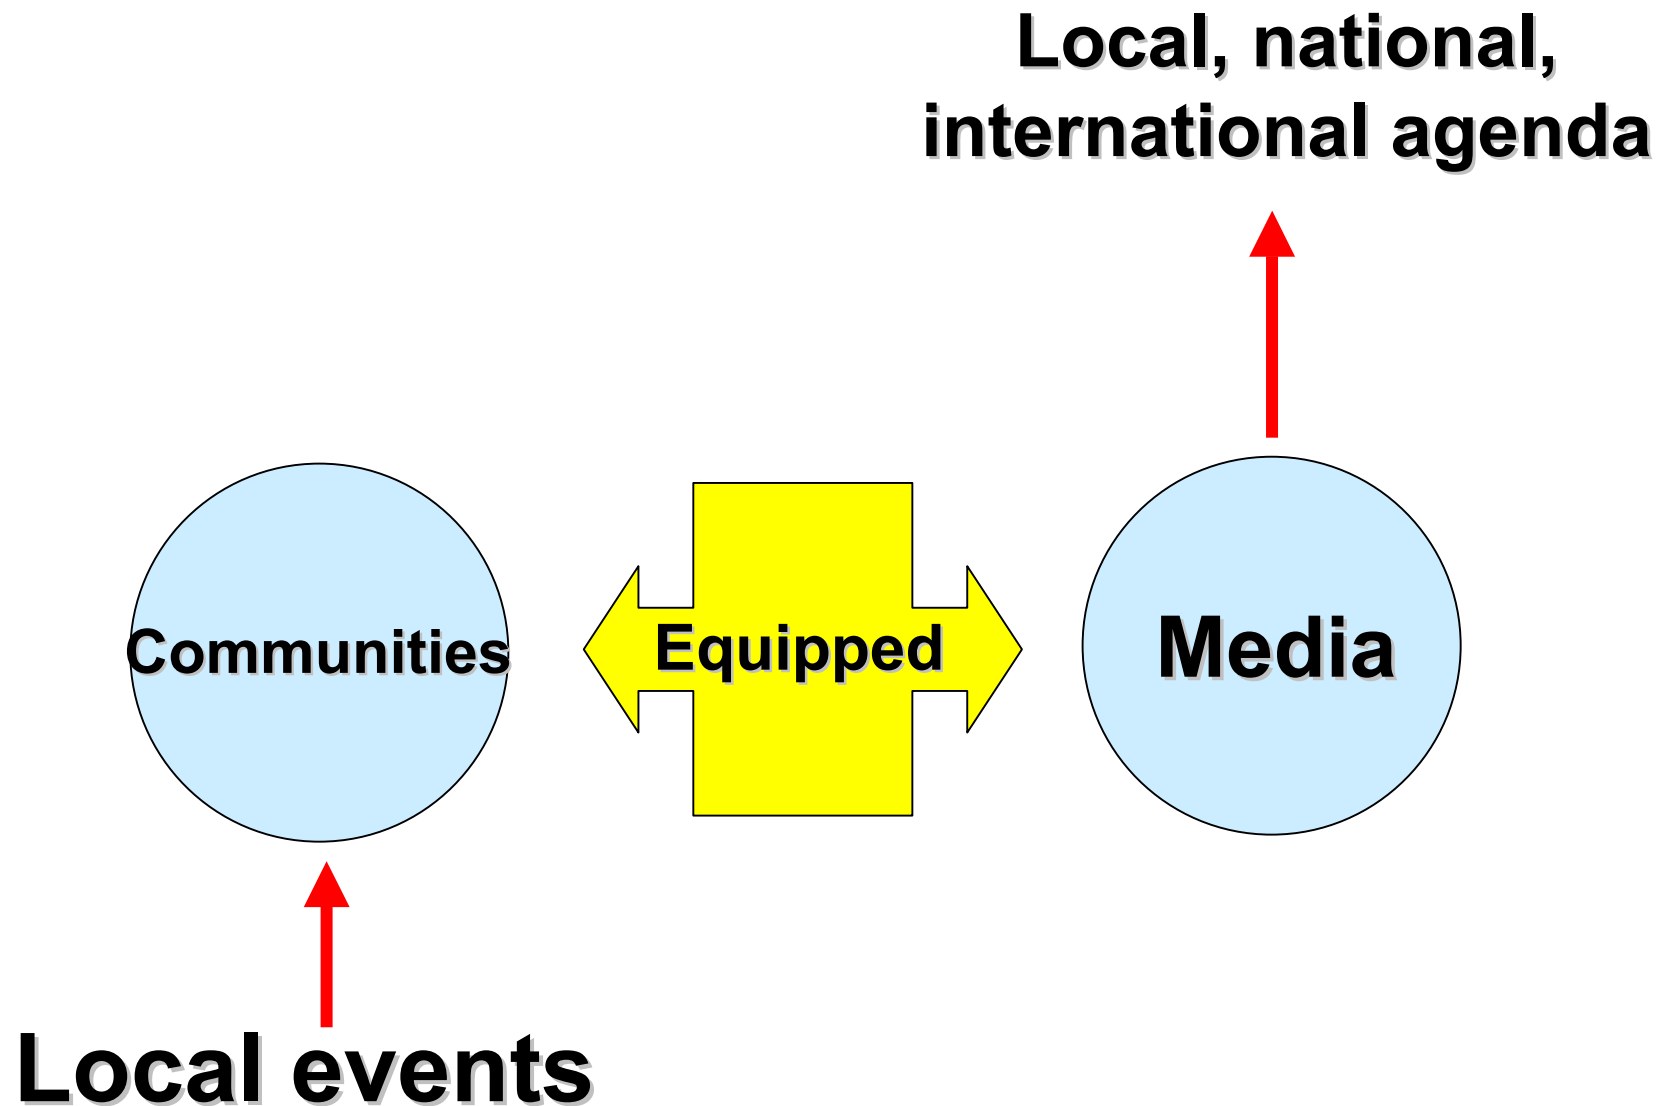

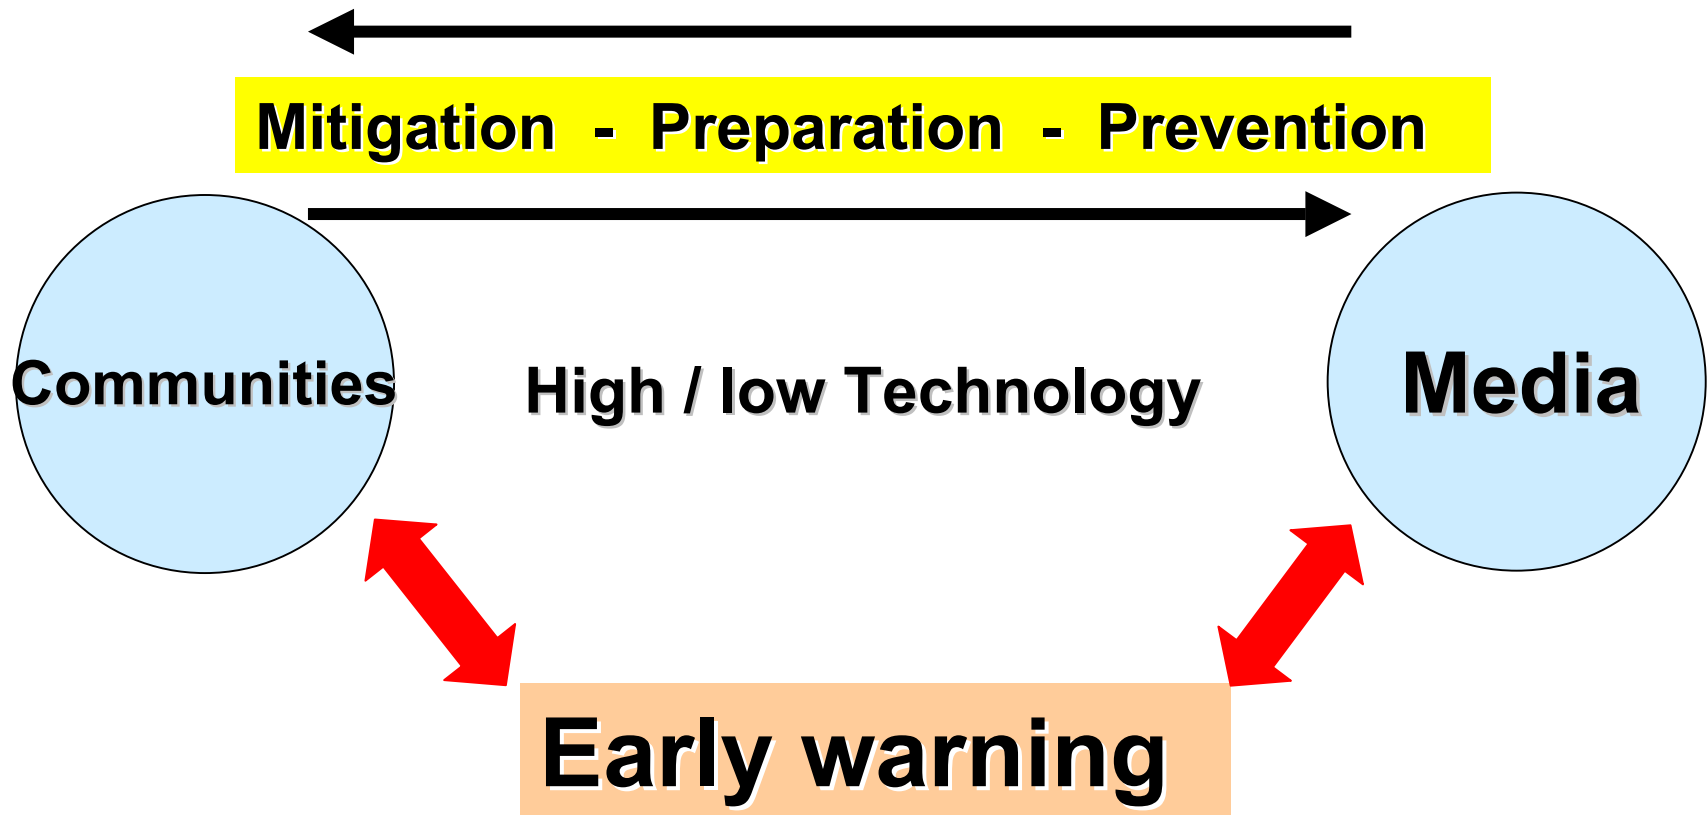

By getting used to utilize the radios, communities have been **able to inform** about different things: weather conditions, activities at the community, meeting reports, informs **about local emergencies**, etc

Thanks to the radio equipment and networking, **media has more accessibility of relevant information at local level** and by disseminating it, allows in to the agenda of the public opinion issues that could help to save lives at some point in time

Mass media **capacities** to mobilize people: financially, physically, socially, and emotionally

Requires be more proactive to **avoid human suffering**

But also, from disaster related agencies, to also be proactive to **advocate issues** when people are at risk.

The question then is how to make risk reduction an important issue into the mass media agenda?

Qualifications of been:

Spectacular
Unexpected
Extraordinary

While at the same time, **millions of people** are in serious danger of a particular hazard, thousand of people **die everyday of AIDS**, or are **dying for starvation** are no longer frontline of the news.

At some point in time, it seems that it was decided that **human suffering requires to be spectacular, unexpected, extraordinary to grasp the attention** of local, national authorities, mass media, and civil society.

1. Media's social responsibility point of view
2. New technologies, others sources information

helps to **advocate** for the need to address
risk reduction issues in a more global
context.

University program on Disaster Information Management addressed to teachers of the faculty of Communication. As a result of it, three universities participated and the year after, a number of selected teachers organized with the Red Cross had similar training addressed to journalist.

it is also the role of organizations such as the Red Cross to promote initiatives that **enroll not only the education sector but also the media** as key actors to contribute on disaster risk reduction

By doing so, **involving** the educational and media on disaster reduction, there could be high probabilities that **public opinion will increase** their interest on risk reduction matters.

an audio soap opera has been produced with the **involvement of different organizations** with interest on disaster reduction initiatives, with the aim to offer to the media high quality audio program **designed to educate the public about what can be done in disaster reduction**

Same audio material helps to use on **different community sectors, such as schools, sports clubs, business in general...**

for better understanding of the measures and actions that communities should need to consider for disaster reduction.

In conclusion:

- 1.knowledge and understanding of the matter.**
- 2.willingness for networking.**
- 3.participation of the most vulnerable one's is in place**
