

# Disaster Reduction Technology List on Implementation Strategies

TAKAYUKI NAKAMURA

Director, Office for Disaster  
Reduction Research of MEXT

## 1995: Hanshin- Awaji (Kobe) Earthquake Disaster

- \*Complex urban disaster

- \*International impacts among APEC economies

## 1999-2004: EqTAP project (sponsor: MEXT)

- \*Disaster reduction technology development based upon regional perspective & stakeholder involvement (implementation strategies)

## 2004-2005: An information sharing scheme incorporating disaster reduction technology

- \*A proposal to WCDR

- \*Disaster Reduction Technology List on Implementation Strategies

# Procedures to develop this List

- ❁ 1. A task team was constituted by MEXT under the council entitled “Committee on Research and Development for Disaster”.
- ❁ 2. Technologies contributing to the disaster mitigation at low costs are mainly selected.
- ❁ 3. Technologies including both dialogue with communities and stakeholders and the implementation strategies are principally chosen.

# Next Steps

- ❁ 1. Present volume is only a first-step document.
- ❁ 2. Technologies of this list should be examined if they can be applied to developing countries, and what kind of technologies ought to be added.
- ❁ 3. A “World List” should be developed in order to extend and enhance this list with much cooperation from many countries all over the world.
