

Action points for international actors

- Focus assessments on capturing local coping capacities and priorities – not just needs and vulnerabilities
- Ensure every disaster intervention supports livelihoods and long-term recovery
- Create coalitions with communities as equal partners in design & implementation, with women as full participants
- Document best practice in community resilience, share with other actors and scale-up what works
- Targets: 25% of aid through local NGOs & CBOs, 20% of aid to community based disaster reduction, 10% of aid to local NGOs' core costs
