community based disaster management

:

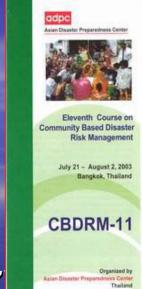

regional experience from Asia

Zubair Murshed

21 January 2005

CBDM Experience of ADPC

- Community based disaster risk management course (since 1997)
- Asian urban disaster mitigation program (1997)
- Climate risk management program (1999)
- Flood emergency management strengthening (2003)
- Partnerships for disaster reduction in Southeast Asia (PDRSEA) 2001

Understanding institutionalization?

Multi-sectoral and multi-level process

A state where role of community groups is recognized by the government and their efforts are supported.

Performance of following functions by the government officials and departments in collaboration with at-risk communities:

- Group formation/strengthening;
- Risk communication;
- Technical skills development;
- Funds for risk reduction actions;
- Physical inputs e.g. seeds, plants, construction materials;
- Technical advice to individuals, families and groups;
- Linking Scientific knowledge with community coping mechanisms;

CBDM Experience of ADPC

- Practitioners skill building;
- National adaptation of CBDRM training;
- Mobilize municipal and local government;
- Build technical capacity of municipal, commune and local government in facilitation;
- Interface between commune, local and municipal DM committees and communities for joint action;
- Linking farmers with scientific information;
- Publication of case studies;

The Knowledge Content

The clear and concise assessment of damages, losses and injuries in the aftermath of a disaster is a prerequisite for the effective planning and implementation of relief and recovery. Listed below are some key points about damage and needs assessment.

1. The objectives of assessments both damage and needs are to determine:

- Nature and extent of disaster
- Damage and secondary threats
- Needs of the population
- Resource availability and local response capacity
- Options for relief assistance, long-term recovery and devt.
- Needs for international assistance

2. Assessment Types

- Initial Assessment and
- Detailed Assessment

3. Elements of the Assessment Process

Every assessment process comprises of five basic elements or activities

- Planning and preparation
- Survey and Data Collection
- Interpretation and Forecasting
- Interpretation and For
