Highlights

- Add your voice to the development of a technical Sendai Hazard Definition list
- Discover the latest technological advances in disaster risk reduction solutions
- Find out how big data can support enhanced action for resilience

- Learn from experts on how science and technology is shaping resilience towards sustainable and inclusive societies
- Contribute to the Science and Technology Roadmap for Sendai and greater coherence between the 2030 agreements
- Launch of the new journal: *Progress in Disaster Science*

The Forum will feed into the GP2019, The Commission on Science and Technology for Development (CSTD) and high-level UN meetings on climate change and the SDGs.
