@humdata
What does HDX offer?

We simplify data sharing
We extend the impact of data
We tell the story of data
We help standardize data
“You usually get the data once it’s already obsolete.”

“Getting the right data at the right time is the biggest challenge.”

“We have a lot of data, but no information.”

“Policy makers don’t have time to read reports.”

“Letting people know what data we need is difficult.”

“You need the context to be able to validate the data.”

“It’s important to link the metadata with the methodology.”

“The issue is the granularity of the data, not having all the details.”

### Background

The complex emergency in the Lake Chad basin is affecting some 17 million people in Nigeria, Cameroon, Chad and Niger. It has destroyed lives and livelihoods and forced millions to flee their homes. The majority of the displaced are sheltered by communities who are among the poorest in the world. Across the region, one in three families is food insecure, and malnutrition rates have reached critical levels. One in every two people needs urgent humanitarian assistance.
