Field practitioners’ e-learning for DRR

Welcome to the training
The target group for this training is project and programme staff working with humanitarian assistance or development aid. Both those with a lot of practical experience, who would like to add some theoretical knowledge to their CV, and those who have the theoretical knowledge and are looking for practical skills.

The training was developed under the project ‘ACT for Humanitarian Capacity Development in EU Aid Volunteers Initiative’. Funded by the EU Aid Volunteers Initiative and implemented by a unique consortium of ACT alliance organisations and higher learning institutions.

Okay let’s get started.
I will now call the local government representative.
You should listen in, to get a feel for how we introduce ourselves.
