Role of the National and Local Platform to support the National Strategy for Disaster Risk Reduction

Republic of Cuba. May 22 th, 2017
1- To increase the possibilities and capacities of early warning systems (hydro-meteorologic, earthquakes and droughts)

2- To continue strengthening local capacities for Disaster Risk Reduction, in cooperation with UN Agencies, NGOs and countries.
3- To continue strengthening local capacities for prevention and response to hydrological and agricultural events.
4- To continue strengthening Disaster Risk Reduction knowledge and its dissemination to the whole of society.
